Copy 7 of 7

25 July 1960

MEMORANDUM FOR : IPD/COVER Officer

SUBJECT : Minneapolis-Honeywell Project OXCART

25X1

1. In going over some old notes, I discovered that I had made a listing of current and projected employment of inertial guidance systems manufactured by Minneapolis-Honeywell. These may be useful in the course of your thinking on how we can adequately cover the construction of a sophisticated system of this sort for OXCART.

2. At the moment Minneapolis-Honeywell manufactures inertial guidance systems for the following unmanned devices:

Centaur Missile
Bomarc Guided Missile
Fairchild Osprey Drone
Republic Swallow Drone

This is the extent of the Minneapolis-Honeywell backlog for these systems.

3. As far as the auto-pilot is concerned, the only other customer presently backlogged with Minneapolis-Honeywell is Lockheed for whom Minneapolis-Honeywell is manufacturing a pilot for the F-104G.

SIGNED

JAMES A. CUNNINGHAM, JR.
Acting Chief, IPD-DD/P
